WOOD MEDICINE CABINET
RECESSED MOUNT INSTALLATION

ROUGH OPENING SIZE:
23-5/16” (59.2 cm) W
x
30-3/16” (76.7 cm) H

Step 1: Using a pencil and a level, draw the perimeter of the backside of the cabinet in the desired wall location.

See Figure 1.

Step 2: Cut a hole along the drawn perimeter using the appropriate tools.

See Figure 2.

Step 3: Create a frame using frame studs and frame blocks that will fit the width and height of the backside of your medicine cabinet

See Figure 3.
**Step 4**: Carefully complete the frame with studs and frame blocks inside the cutout, making sure the edges align.

*See Figure 4.*

**Step 5**: Place an appropriate amount of wood glue on the inner sides of the frame. Position the cabinet into the cutout and into the frame.

*See Figure 5.*

**Step 6**: The finished installation should have the medicine cabinet front concealing the edges of your wall cutout.

*See Figure 6.*
